Title
NE585 – Nuclear Fuel Cycle Analysis Design Project

Name
University of Idaho · Idaho Falls Center for Higher Education
Department of Nuclear Engineering and Industrial Management

---

1. Proposed Research

2. Motivation

3. Importance & Relevance to Course Objectives

4. Background

4a. Topic

4b. Another topic

4c. Related research

5. Methodology

5a. One part of the methodology

5b. Another part of the methodology

6. Major Outcomes & Deliverables

Workscope 1 – .

Task I. .
Task II. .

Milestone 1. .

Workscope 2 – .

Task III. . (1) . (2) .
Task IV. . (1) . (2) . (3) . (4) .

Milestone 2. .

Workscope 3 – .

Task V. . (1) . (2) .
Task VI. . (1) . (2) . (3) . (4) .

Milestone 3. .

Workscope 4 - Crosscutting discussions & Follow on activities.

Task VII. *Identify lessons learned.* (1) .
Task VIII. *Develop future work.* (1) . (2) . (3) . (4) .
Task IX. *Reproducibility & Validation (R&V).* (1) Reproducibility – . (2) Validation – .

Milestone 4. *Apply lessons learned for future research and engage colleagues in new collaborations.*

7. Contribution to Advancing State of the Art This project will advance the state-of-the-art in nuclear fuel cycle analysis by – (1) A; (2) B; (3) C.

8. Timeframe for Execution

Table 1. Project Timeline

TASKS	AUG	SEP	OCT	NOV	DEC
